

## One of the smallest, most durable bar code readers

 on the market.A lightweight that works in a heavyweight class, this reader proves its worth day in and day out. Its dual-field optical platform allows the CR1400 to read wide and very small bar codes with an approximate 100 mm focal point. Intuitive targeting makes reading 1D, 2D and Postal bar codes quickly, reliably and affordably. Glare reduction technology promotes quick reads from bottles, pre-packaged food products and shiny cans. No longer must coupons on mobile phones slow down the checkout process. And reading codes on syringes, IV bags or items with extra plastic wrapping is never a problem.

## There's nothing like having a reliable partner on the job.

From healthcare to retail to other high-use environments, a disinfectant-ready plastic housing and IP54 rating protects the performance and life of the reader against harsh cleaning agents, dust and water ingress-even multiple drops.

If you're on the move, working in unpredictable environments or need to make accurate read codes on a range of items, the CR1400 makes a valuable addition to your lineup.
